Database

SQL Server/Azure

- -Learning curve
- -Different datatypes (e.g. used int instead of enum)
- -Azure account ran out of credits
- -Changing IPs
- -Update database structure

Upgrade now to keep building in Azure

Your free credit has expired, so we've disabled your subscription and services. It's an easy fix—just upgrade to a pay-as-you-go subscription to keep using all your configured services and data in place. You get:

| Rule name | Start IP | End IP | |
|-----------|----------|-----------------|-----|
| | | | *** |
| All IPs | 0.0.0.0 | 255.255.255.255 | ••• |

Status bar

```
preferences
public void ShowStatusMessage(string message)
{
    tbStatus.Text = message;
    var timer = new System.Timers.Timer();
    timer.Interval = 20000; //20 seconds
    timer.Elapsed += delegate (object sender, System.Timers.ElapsedEventArgs e)
    {
        //stop the timer
        timer.Stop();
        //remove the StatusMessage text using a dispatcher, because timer operates in another thread
        this.Dispatcher.BeginInvoke(new Action(() =>
        {
            tbStatus.Text = "";
           }));
        };
        timer.Start();
}
```

```
mainWindow.ShowStatusMessage("Aircraft Updated");

Aircraft Updated
```

Hashing Users Password:

Step 1: Generate Salt:

Step 2: Generate Hash:

```
public static string CreateSalt(int size)
   //Generate a cryptographic random number.
   RNGCryptoServiceProvider rng = new RNGCryptoServiceProvider();
   byte[] buff = new byte[size];
   rng.GetBytes(buff);
   return Convert.ToBase64String(buff);
public static string GenerateHash(string input, string salt)
    byte[] bytes = Encoding.UTF8.GetBytes(input + salt);
    SHA256Managed sHA256ManagedString = new SHA256Managed();
    byte[] hash = sHA256ManagedString.ComputeHash(bytes);
    return Convert.ToBase64String(hash);
```

Hashing Users Password:

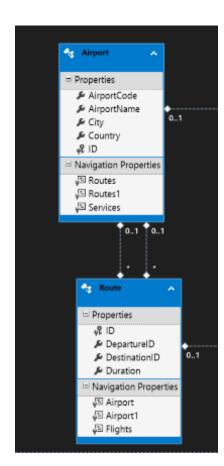

```
Step 3: Generate Hash: public static bool AreEqual(string plainTextInput, string hashedInput, string salt)

{
    string newHashedPin = GenerateHash(plainTextInput, salt);
    return newHashedPin.Equals(hashedInput);
}
```

Flight consistency
